The MOST Cost-Effective Paneling System Made in the U.S.A.

Extrutech Plastics wall and ceiling panels are bright and highly reflective and will help illuminate any wash bay. Customers prefer a bright well-lit wash bay over a car wash that is dark and uninviting. The moisture-proof panels are ideal for the high-moisture carwash environment, providing the extra protection your walls and ceilings need. Panels install quickly and easily, with no exposed fasteners. Available in widths of 12" and 24", and cut to length from 4 to 20 feet. Panels are stain resistant, low maintenance, and easy to clean while maintaining a fresh, up-to-date appearance.

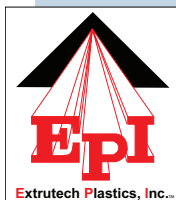

Don't be fooled by lesser quality look-a-like panels with coated or painted on surfaces that can fade, peel or flake. Extrutech panels are manufactured with 100% virgin, exterior-grade PVC - never co-extruded, painted, or coated and will maintain their exceptionally shiny white surfaces for years to come.

Wall and Ceiling Panels meet ASTM E84-05 and CAN/ULC S102.2-3 Class A rating for smoke and flame with a ten-year warranty on panels. "ISO 9001:2000 QMS" Certified

If you are looking to • Brighten your walls and ceilings • Lower your lighting bill • Use milder, safer, cleaners • Reduce cleaning and maintenance time • Keep your walls sparkling bright • Prevent salt and cleaners from destroying your walls • Maintain a safer, more welcoming environment, then please give us a call!

If you need replacement doors to go with your sparkling white walls and ceilings, Extrutech manufactures smooth, bright white PVC doors that will not rot, rust or corrode like your old steel doors do. For more information on these and our other products, please visit our web-site, at www.epiplastics.com.
