

# The Bi-Level Brush

## With The Exclusive Tri-Level Surface

Reader Service No. 18

### This Versatile Brush is Perfect for Big Coverage

Erie's version of the bi-level style brush has an advanced design that makes it perfect for cleaning larger areas. A flat, dense level of soft material is always in contact with the surface being cleaned because our fill material is uniquely cut on 3 planes. These terrific brushes are adaptable to foam-feed or dip-style and can be used with a choice of extendable flow-through handles, 3' to 6', 4' to 8' or 6' to 12' long, and will fit Acme or NPT threads. Just give Erie a call.

★ A Choice of 8 Different Kinds of Fill Material

★ 4 Textures: FIRM, SOFT, EXTRA SOFT or SUPER SOFT

★ A Whole Rainbow of Fill Material Colors

Your Satisfaction Is 300% Guaranteed With The
